About

I'am Richa

I am a third year grad at SRM Institute of Science and Technology pursuing my B-Tech in the branch of Computer Science. I am a tech enthusiast, always trying to learn new technologies and apply them to build pet projects of my own. During my engineering days, I have learnt building responsive web apps using HTML, CSS and JavaScript; I have also learnt and used MySQL for backend applications and exploratory data analytics. To boost my problem solving and logical thinking I regularly practice algorithms and data structures on HackerRank and Leetcode. I am always eager to learn new skills and explore technologies
